KITCHEN

WHAT IS IMPACT FARMING?

Impact Farming is an alternative investment model that allows you to own **income-generating physical assets** rather than traditional stocks or financial products.

With The Compost Kitchen, you own **Earthworm Farms**, which we manage on your behalf, producing **vermicompost** that generate revenue.

We handle all the farming operations—feeding, breeding, and selling—while you earn passive income from the sales of sustainable agricultural products.

Own earthworms on a commercial earthworm farm

HOW IT WORKS

- You purchase Earthworm Farms through our platform.
- We manage the entire farming process, including breeding, feeding, and harvesting.
- You earn a share of the revenue generated from the sale of vermicompost.
- Projected returns of 10-12% per annum over a 4-year investment term.

YOUR INVESTMENT AT A GLANCE

- Investment amount: **R1,000 per Earthworm Farm**
- Investment term: **4 years**
- Projected returns: **10%-12% per annum average**
- Products sold: **Vermicompost**
- Revenue share: **Annual payout**
- Management: Fully maintained by The Compost Kitchen

WHY EARTHWORMS?

South Africans love their gardens and are increasingly embracing earthworm farming as a **rewarding hobby**, and as a key part of growing organic vegetables at home. More than just a sustainable practice, vermicomposting is an easy and effective way to enrich soil naturally, reduce food waste, and create a thriving home garden.

Despite the rising awareness of **regenerative gardening**, local vermicompost production struggles to meet demand. Gardeners, small-scale farmers, and eco-conscious households are searching for **locally made organic amendments** to boost soil health without relying on chemical fertilizers.

Investing in earthworm farming makes sense—not only are you contributing to soil regeneration and waste reduction, but you're also tapping into a growing market for **sustainable agriculture**.

KEY FACTS

Earthworms can double their population in 3 months and live up to 4.5 years

Earthworms' feces is called Vermicompost, which is a biologically and nutrient rich organic fertilizer

YOUR IMPACT FARMING JOURNEY

1. Purchase Your Earthworm Farm

Invest in as many units as you like (minimum 1 Earthworm Farm).

2. We Manage the Process

Our expert team takes care of all farming operations.

3. Earnings are Generated

Vermicompost is sold to home gardeners, organic farmers, and eco-conscious consumers.

4. Annual Revenue Share

Your share of revenue is distributed yearly.

5. Reinvestment

At the end of your 4-year term, your earthworm farms return back to our ownership, but you can choose to reinvest in more.

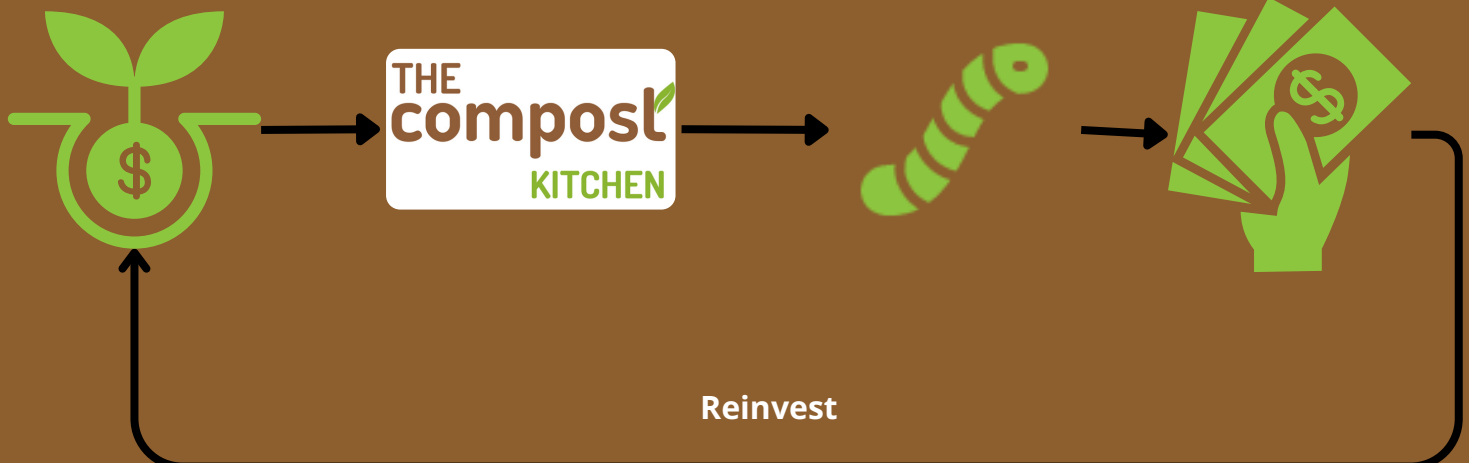

OWN EARTHWORM FARMS

You invest in earthworm farms

We farm your earthworms

Your earthworms produce vermicompost

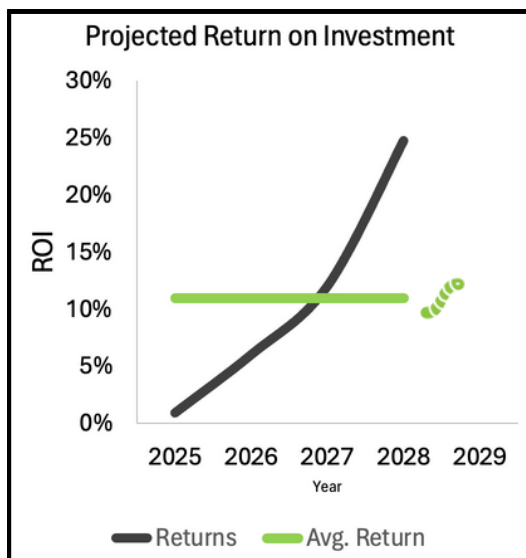

You earn profits

ANNUAL INCOME

Returns start out low and ramp up over time as your earthworms mature and production increases, to produce an average return over the investment term.

Your average return per annum over the investment term of an Earthworm Farm is projected to be **10%-12%**. For Example; If you bought 50 Earthworm Farms you may turn R50,000 into R75,000 after 4 years.

- Income will be calculated annually and disbursed at the end of each investment year.
- Investors can track performance through periodic updates and financial reports.
- The revenue-sharing model is designed to be fair, transparent, and directly linked to business performance.

It is important to remember that these are the projected returns with estimated income periods over the lifespan of your Earthworm Farm investment.

This investment is a real farming venture on an actual farm in South Africa and the production of vermicompost can be influenced by many factors such as distribution, weather, and even economic factors. Harvest periods are approximate and may change as a result of agricultural variables such as weather.

RISKS & MITIGATION STRATEGY

Risk	Description	Mitigation Strategy
Environmental Risks	Variability in climate conditions impacting production.	Earthworm farms are housed in controlled environments to ensure consistent production.
Market Demand Fluctuations	Changes in demand for vermicompost.	Diversified customer base: home gardeners, landscapers, farmers, and bulk buyers.
Operational Risks	Challenges in scaling production or farm efficiency.	Experienced management team, automated processes, and data-driven decision-making.

Be Part of the Story

At The Compost Kitchen, we're on a mission to empower urban communities to become champions of sustainability by making composting simple, accessible, and affordable.

To do that we are raising funds through our revenue-share crowdfund to scale up our earthworm production.

This is your opportunity to be part of the story of how we get to be the largest earthworm farmer in the world by 2030.

Be part of the story by investing with us.

FREQUENTLY ASKED QUESTIONS (FAQs)

Do I own shares in the company?

No, investing in The Compost Kitchen Impact Farming does not grant you equity or shares in the company. This model allows you to benefit from a sustainable, income-generating asset without the complexities of company ownership.

When do I start earning?

It takes <6 months to establish your Earthworm Farm for 1st income production.

What happens after 4 years?

Over the investment term, your investment is paid back incrementally, with profits, and after the period lapses, the earthworm farm returns back to our ownership. You'll have an option to reinvest your earnings to compound your profits.

How are the returns calculated?

Returns are based on the total revenue generated from vermicompost sales, minus operational expenses, distributed among all investors proportionally. The % of revenue is determined by us year-to-year based on operational performance.

Is this a guaranteed return?

Returns are not guaranteed as with any agricultural venture. However, we mitigate risks through diversified sales channels, expert farm management, and market-driven pricing.

Can I visit the farm?

Yes! Investors are welcome to visit The Compost Kitchen's earthworm farms on designated visiting days to see the operation in action.

What if I want to sell my investment before the 4 years are up?

The investment is designed for a 4-year term so if you want to exit early you would need to find another investor to take over your Earthworm Farms.
